You asked, We Answered...

Why Should I Hire Glitz Event Design? There are other planners that are cheaper than Glitz Event Design. Why shouldn't I go with a cheaper planner?

We are of the mindset that you get what you pay for. Candace approaches each wedding as if it were her own. She works with a team of the best vendors that Chicago has to offer and only has chosen to work with a selected few.

Candace once read a blog that compared wedding planning to foundation and wanted to share this with you.

Imagine a foundation from Walmart to replicate the stunning coverage you saw in Neiman Marcus. A good wedding planner is like foundation.

"A great foundation helps you cover imperfections, hide flaws, enhances what you already have and makes you look better. A wedding planner can do the same things. S/he can help you cover all of the things that aren't quite perfect or unexpected mistakes (at times without you knowing!). But additionally, instead of recreating your event vision, s/he will take what you want and desire, enhance it and make it better."
~Wedding Planner, Terrica (Fabuluxe)

The quality of the foundation is obviously going to be much different. Compare cheap foundation against high quality foundation and you can immediately see the difference. It becomes even more evident as time goes by which foundation looks and holds up better. The same is true when it comes to wedding planners. We plan weddings full time. Our full attention is on our clients and providing them the best. Cheaper planners have to run more volume through their businesses to break even so that means more distraction again.

We are very specific about the type of bride and groom we want to work with and we are more concerned with the connection between our client and us being a good fit than accumulating a volume of clients. Our philosophy to this is simple, *"Quality is more important to us than Quantity."*
